Philips
Baby Monitor

SBCSC465

Sound level lights

Baby monitor with sound level lights lets you see the level of your baby's sounds. System Check continuously checks if your baby monitor is working reliably and gives a visual and audible alarm if there are any irregularities.

Convenience for you and your child

- Charging Base keeps batteries recharged and ready for use
- Simplifies the selection of the volume you prefer
- Sound level lights display the level of your baby's sounds
- High quality microphone has adjustable sensitivity
- Save money with rechargeable parent unit and charging base

Reliability & Piece of mind

- More transmission channels lowers the risk of interference
- Low battery indication shows when to refresh batteries
- Analogue Pilot Tone minimises interference from other devices
- Digital System Check ensures the monitor is working reliably
- System check alarm Informs of malfunction or out of range
- System check light reassures you that the monitor is working

Flexibility in monitoring your child

Comforting your baby

PHILIPS

- Volume control

Accessories
- AC/DC adaptor: 2x 9V DC 200mA
- Batteries: 4 x AA baby unit not incl.
- User manual

Power
- Battery voltage: 4.8 V
- Operating time on battery: 12 hr

Product highlights

Charging base
Thanks to the built in battery charger in the base, you get extra freedom (when fully charged) to take the parent unit with you around the home and stay in touch with your baby. It' s also a convenient place to store the parent unit, and ensure it's always ready for use.

Volume control
A handy rotary control sets the volume to the ideal level to suit your preference.

Sound level lights
Sometimes its a great help to 'see' when your baby makes a sound. This row of lights provide you with a clear visual indication.

Adjust microphone sensitivity
Possibility to set the sensitivity of the microphone so you only hear the sounds you want to hear.

Rechargeable parent unit
Putting the parent unit on the charging base will automatically start recharging of the batteries, so it's always ready for portable use.

Number of channels
A choice of channels significantly reduces the risk of interference or sounds from other baby monitors in the neighbourhood.

Low battery indication
To know in time when the batteries need to be recharged or replaced.

Digital Pilot Tone
A special tone that is transmitted along with the audio signal minimises the chance of interference from other wireless appliances.

Digital System check
A visible and audible warning is activated if the communication link between the baby unit and parent unit is unreliable.

System check alarm
The parent unit gives an audible alarm when it is outside the communication range of the baby unit or when the communication link is not reliable.

System check light
Green light on the parent unit lights when the connection between the baby and the parent unit is reliable and flashes when the parent unit is outside the range of the baby unit or when the communication link is not reliable.

Use in & around the house
Rest assured that as you take the parent unit with you as you move in and around your house, the parent unit will stay in touch with the baby unit. It keeps you reassuringly informed and able to respond quickly when baby calls.

Range in open air
In the open air with no obstacles, the safe distance between the baby unit and parent unit is greater than indoors, so you can take the parent unit with you into the garden or to the neighbour's house without losing contact.

Night light
A soft, glowing light is reassuring and provides a focal point in the dark.
